## KNZ® WILD

KNZ salt licks are essential to secure the individual need of salt, minerals, trace elements and vitamins, essential for good health, and therefore the performance of your live stock. A possible lack of these elements can result in reduced appetite, milk yield, growth and natural resistance. Also, fertility problems and weight loss can increase. Each animal has it's individual (salt) need. For this reason KNZ has developed special licks for cattle, calf, sheep, horses and game. Because of the natural licking behaviour of animals they are able to balance their need for salt, minerals, trace elements and vitamins by means of a salt lick.

All KNZ licks are developed in intensive collaboration with end-users, nutritionists and universities. KNZ salt licks are made of a very pure salt without any artificial colouring agents, fragrances and flavourings agents.

## PRODUCT DESCRIPTION

Salt, minerals and trace elements are essential to the health of big game. Salt is rare in the natural environment of game. KNZ Wild is especially developed to meet the needs of game. The salinity of KNZ Wild stimulates the appetite and the need for water. This contributes to a good physical development. The feed of KNZ Wild is an effective and efficient way to meet the individual needs of game.
